CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA. TUESDAY, OCTOBER 21, 1919

TWO CENTS

MONESSEN TIN PLATE PLANT TO RESUME WORK WEDNESDAY MORNING

Employees Hold Meeting on Sunday and Decide to Return

STEEL PLANT FORCE LARGER

The Tinplate mill at Monessen will resume operations at 8 o'clock Wednesday morning, according to reports received from there today. It is said that a large number of the employees of this mill held a meeting outside the borough limits on Sunday afternoon last and voted overwhelmingly to return to work. The result of the meeting was made known to the officials of the company who decided to open the mill Wednesday morning for all those who wished to return.

It had been the decision of the mill management to keep the mill closed for an indefinite period and no attempt was made two weeks ago, when other mills started, to resume operations. All employees were paid off and checks lifted and those employees who would have been willing to return, were advised to seek work elsewhere. However, the attitude of the men was such, after a shut down of four weeks, that the mill officials deemed it advisable to again resume operations.

It was also stated that a large number of additional men returned to work at the Pittsburgh Steel company plant. The Greeks and Italians, it is reported, had decided to go back to work, and a large number of these men reported for their old jobs Monday morning.

The same condition is reported from Donora, where it is said the working force of the mills is being increased from day to day, additional men reporting every morning.

Conditions remain very quiet in both towns, except for the attempts being made in Donora to set fire to certain properties with a view to their destruction. Borough and state officials are hunting for these criminals and hope to land them soon.

CARDS ISSUED FOR LEVENSON-POSNER WEDDING

Invitations have been issued by Mr. and Mrs. Benjamin Posner, of Mt. Pleasant, for the marriage of their daughter Anna, to Abe Levenson of Charleroi, Tuesday afternoon, October 28, at 5 o'clock p. m., the ceremony to take place at the home of Myer Posner, College avenue in Mt. Pleasant.

McVeys Dances

Dance tonight at Armory hall, Monongahela return engagement of Fischer's orchestra of Kalmazoo, Mich., assessment \$1.50. Thursday night Charleroi, Legion orchestra of Pittsburgh, assessment 50 cents. Hal-lowe'en masked dance at the Arm-ory, Parker's Original Big Seven of Columbus, assessment \$1.50. 117-13*

JURORS SUMMONED FOR NOVEMBER TERM

Among Charleroi citizens who have been summoned for jury duty for the November term of court are: J. H. Bowers, Paul Gibson, Frank Riva and Charles H. Richards for November 24; and John C. McKean for the week beginning December 8.

DONATION MADE BY CLUB TO CHARITY

Agreeing to pay \$50.00 to Donora charities and to surrender several hundred dollars worth of liquor found when their headquarters in an alley back of McKean avenue, Donora, were raided one night last week, officials of the town in Justice Ford's court, tacitly admitted violation of the liquor laws after testimony had been given to operations. All employees were paid off and checks lifted and those employees who would have been willing to return, were advised to seek work elsewhere.

The officials will turn a barrel and a half of whiskey over to their attorney, together with seven barrels of hard cider, which are to be held under agreement until the present industrial disturbance is ended. They then announced they would take up the question with the district attorney as to whether they could retain the liquor and dispose of it by legal methods.

It was agreed that the club was to remain closed until final disposition of the liquor is made. Testimony showed that the club had been regarded as a nuisance in the neighborhood and a formal charge to this effect was filed by Constable Titus.

BRING SUIT FOR HEAVY DAMAGES

The damage suits have been filed against the Bradford Gas Coal company of California, to recover for coal alleged to have been unlawfully mined from under the land of another, and for damages to surface arising from the removal of coal. Both suits come from California, where the defendant company operates a coal mine. One suit is brought by Clara N. Huber, of East Pike Run township, who seeks to recover for the illegal mining of 2,190 tons of coal, valued at \$826, and suit is brought under the law for \$2,628 or triple the value of the coal. The other suit is brought by Catherine F. Reeves, of Coal Center, to recover alleged damage to surface of her lands.

Eschre and Five Hundred At Elks Club, Charleroi. Tuesday evening October 21st at 8:15 under the auspices of the Ladies Italian Al-ary Society. Admission 25 cents. 117-11

Belle Vernon will Welcome Soldiers on Armistice Day

Belle Vernon will celebrate Tuesday and announcement of their se-lection will be made later.

At 3 o'clock a football game will be played in one of the big fields at Gibson, permission having been given by Dr. Daly. Contesting teams will be made up of returned service men and an exciting game is looked for.

In the evening a banquet will be tendered the guests of honor at the new building recently erected by the of the most successful ever held in glass works, and a parade will take place at 7 o'clock, formation being on upper Main street. Following celebration will begin at one o'clock the parade the affair will be turned in the afternoon, with the dedication into a Mardi gras, in which every of the honor roll and the honor one is expected to join. The town flags won in the Victory loans. This will be profusely decorated for the feature will take place in front of occasion and with the door wide open the First National Bank, where the Belle Vernon proposes to give its honor roll is located. Prominent soldiers and visitors a day of rare en-speakers will be engaged for this fe-joymen.

NEW COUNCIL OF U. C. TRAVELERS FORMER RESIDENT ATHLETIC DIRECTOR

The new Council of the United Com-mercial Travelers of America, to be known as the Monongahela Valley Council, will be instituted in Char-leroi, Saturday, October 25th. The afternoon session will begin promptly at 3 o'clock, and judging from reports the new Council will start with a large membership. Sales managers, wholesale house salesmen and travel-ling men from Monongahela City to Brownsville will be represented. The following Grand Officers of the or-ganization will be present:

Grand Councilor, S. C. Dinan, of Williamsport, who will conduct the installation ceremonies. Grand Secretary, W. E. Porter of Pittsburg. Past Grand Councilor, P. P. Mc-Nabb, of New Castle. Past Grand Councilor, W. C. Baum of DuBois. Past Grand Councilor, P. A. Pat-erson of Altoona. Grand Executive Committeeman, C. F. Harvey of Pittsburg.

The degree work will be put on by Pittsburg's famous degree team from Fort Pitt and Duquesne Councils. The following Councils of the Order will be represented: Indiana, Greens-burg, Uniontown, Pittsburg, Mc-Keesport, Washington, Beaver Val-ley, New Castle and others. A ban-quet will be held at the Hotel Arthur at 6 p. m. The headquarters for the day will be at Hotel Charleroi and the degree work will be exemplified at the Malta hall, Fallowfield avenue.

Masquerade social on Tuesday Oc-tober 28 at Episcopal church room Pittsburg on Monday to Abe Levenson of Charleroi, and Anna Posner of Mt. Pleasant. 117-12-p

Coming Majestic Theatre Thursday NORMA TALMADGE in "THE NEW MOON"

You have seen her as an American girl, an English girl, a French girl, a Chinese girl and an Indian girl. Now see her as a Russian girl

NO BLANK WATCHER CERTIFICATES FOR THE NOVEMBER ELECTION

EDUCATIONAL MEETING AT THE CARSON SCHOOL

An educational meeting will be held at the Carson school house, Fallowfield township, Friday evening, October 24. Assistant County Superintendents Miller and Dusen-speak are scheduled to give addresses at the meeting.

MAY PLACE SUGAR ON WAR-TIME BASIS

It is intimated that we may once more be put back on sugar rations, due to the scarcity of the sweet stuff, and for which there appears to be an inordinate demand. It is said that the increased use of sugar for soft drinks is one of the big factors in using up the sugar supply, while large cargoes of raw sugar are tied up by the longshoreman's strike. Another factor is said to be the unusual-ly large amount of wine that is being manufactured from grapes by the for-eign population, all of which requires great quantities of sugar. Figures show that the normal demand of su-gar has largely increased, being sev-eral million pounds greater this year than ever before. When there will be a better situation government of-ficials are unable to say, and it is possible that war-time regulations will have to be enforced once more.

DINNER AND AUTO RIDE TO EMPLOYEES

W. H. Milliken of Charleroi and J. H. Claybaugh of Brownsville, owners of the Claybaugh & Milliken shoe stores in Brownsville and Charleroi, entertained their em-ployees Sunday last with an auto-mobile trip and a dinner at Addison, on the National pike. The party left Brownsville at 10 o'clock and included Mr. and Mrs. J. H. Claybaugh and son Martin, Misses Mary Ma-dera, Hazel McPherson and Paul-ine Massey. Mr. and Mrs. Paul Burd, Nelson Steele and Thomas Labin of Brownsville and Misses Susie Jewell, Rose Lundy and Nell Pierson and W. H. Milliken of Charleroi.

The party arrived at Addison at 11:30 o'clock and after dinner drove on to the Maryland line, where per-mission had been secured to visit a chestnut grove, where the party en-joyed themselves for a time, after which they returned to Chalk Hill, where supper was served. The trip was made home later in the evening and the outing proved to be a most en-joyable occasion.

Dr. Scholl's foot specialist all this week. Schmieler and Kimmins. Free examination and advice. 116-13* in Donora and Monessen.

Commissioners Will Follow Strict Mandates of the Law

WATCHERS MUST BE CERTIFIED

In the matter of watchers for the general election for November 4, the county commissioners on Monday de-cided that they would follow strictly the law. No watcher certificates will be issued in blank and none will be issued except through certifica-tion from the chairman of the com-munity committees of each party.

Upon his certificate to the county commissioner the name and address of the party desired to be appointed as watcher, the commissioners' office will issue a certificate, filled out in that office, to the person for whom certification is made. That will mean there will be a record of each watcher at this election.

Each party under the law, is en-titled to three watchers for each pre-cinct. There are 150 precincts in the county. There will be no promiscuous is-suing of watchers certificates. The custom has been to give out blank watchers certificate and allow them to be filled out by whoever receive them. At the primaries each candi-date is entitled to two watchers to a precinct, but watcher certificates are not issued to candidates at the gen-eral election. They are issued only through the county chairman of each party.

Judge McVaire, following the un-coering of what appeared to be much corruption at the recent primary election, expressed himself forcibly on the watcher evil that has grown up in the county. It apparently had just become a camouflage by which votes were bought. There were issued in blank for the primaries 6,500 watcher certificates. It looks as if the number at the November election will be less than on thaus-and.

HUNTING JOBS IN OTHER TOWNS

Those who are familiar with steel strikers of other days, say that the shifting of labor that ended other dis-turbances of this kind is beginning to take effect in this section of the valley, as many of the workmen are discovering they are running short of funds. Labor travels from place to place, and there are said to be many coming in from Youngstown and other points west who have con-fessed they were afraid to go to work in their old places, and hence sought pastures new. Men from this locality are reported as doing the same thing, going to other localities to take jobs. This condition has been noted both in Donora and Monessen.

SIMPLE MATTER TO EXPLAIN

As It Happened, However, It Was Rather Embarrassing to One Idle Student.

Professor Gurney was one of the most genial instructors and the most skilful of disciplinarians. As a teacher Gurney was always kind and courteous, but nevertheless a terror to drones and evildoers.

For example, take the case of a student who was afterward a distinguished professor in the medical school. We were reading Cicero's Epistles. In the lesson for the day he was describing a scene in court, when it was evident that in the morning before the witnesses came in they had been suborned and instructed what to testify. I will call the student Drake. He had not looked at his lesson, and when called upon began to translate until he came to this passage:

He could make nothing of it, but looked up with a helpless air and said, "I don't think I understand this passage." Gurney bowed, and with the utmost suavity said: "It means, Mr. Drake, that they had learned their lesson before they came in in the morning."

As that was exactly what it did mean, the fellows set up a shout and Drake dropped into his seat.—Harvard Graduate Magazine.

DETERMINED TO ENJOY MEAL

Ten-Year-Old Was Going to Eat in Comfort if It Cost Him His Savings.

The Lane family decided to help out the mother of the family by decreasing the amount of table linen in the weekly washing. Each member who spilled something on the cloth was required to cover it with a piece of money—of the exact size of the spot. Twice ten-year-old Fred was compelled to hand in a quarter from his paper money. Then one day he came home from the store with his pocket jingling full of money.

At the very beginning of the meal he dropped a bit of gravy. Soon afterward a piece of tomato followed the gravy. Still he showed no concern. His older sister reminded him of the agreement. "Oh, I guess I'll wait until I'm through," was his calm rejoinder.

But one was surprised because on other occasions he had showed much concern over his accidents. But when he produced a pocketful of pennies at the close of the meal and announced that he had come prepared to enjoy a meal once again, everyone understood.—Indianapolis News.

Germans Preserved to Death.

The Nebraska State Journal observes one of the most interesting of recent developments in the dairy industry is the announcement that germs may be killed by pressure. This leads to the belief that the old method of pasteurizing milk by heat, which has been found objectionable in some respects, may be supplanted. It is claimed for the pressure system that the delicate ferments or enzymes in milk are not destroyed and that no changes are made in the taste or general condition. The pressure is applied by means of a hydraulic pump. It is possible to apply as high a pressure as 100,000 pounds to the square inch. A pressure of 35,000 pounds to the square inch for 15 minutes has been found to kill many bacteria. Higher pressure can be supplied when the germs are extracted naturally. In general, it is believed that a pressure of 30,000 pounds for 20 minutes will serve every practical purpose. This material is found in a statement recently issued by the American Chemical Society. Coming from such a source it will be a report as authoritative as well as interesting.

Underclothing made of finely crimped or grained paper is now being manufactured in Japan. After the paper has been cut to a pattern, the different parts are sewed together and hemmed and the places where buttons are to be formed are strengthened with cotton or linen.

The paper is very strong and at the same time very flexible. After a garment has been worn a few hours it will interfere with the perspiration of the body no more than the garments made of cotton fabric. The paper is not sized, nor is it impermeable. After becoming wet the paper is difficult to tear.

New Warships Are Powerful.

Our latest dreadnaughts—Iowa and Massachusetts—mark a great advance in size and power over any previous warships. Their length will be 651 feet, their breadth 96 feet, and their mean draft will be 33 feet. The motive power will be similar to that of the Mexico, that is to say they will have the electric drive. The maximum speed will be 23 knots and they will have a cruising radius of 5,000 miles. Their displacement will reach the unprecedented figure of 43,200 tons. The armament will consist of 12 16-inch guns and 16 six-inch guns.

America's Store of Radium.

The total production of radium element in the United States up to this year is estimated at 55 grams. It was first produced in 1913, in which year 2.1 grams resulted; in 1918 the product was 13.6 grams. Charles H. Villard, writing in Science, estimates that the carnotite holdings of the Standard Chemical company should produce at least 100 grams a year.

The Most Valuable.

So, day by day, and week by week; so, month after month, and year after year, work on; and in that process gain strength and symmetry, and nerve and knowledge, that when success, patiently and bravely worked for, shall come, it may find you prepared to receive it and keep it. The development which you will get in this brave and patient labor will prove itself in the end, the most valuable of your successes.—J. G. Holland.

Reviving the Bride.

They were being married in a small country church that was heated with a stove. Everything went well until at the close of the ceremony the bride fainted. In the general excitement that followed the bridegroom lost his head. He grabbed the empty coal scuttle and rushed to the pump for some water. Then he came running in and dashed a scuttful of black sooty water over his then reviving bride.

Mystical Thirteen.

In the Indian Pantheon there are 13 Buddhas; the apex of an Indian or Chinese temple is crowned with 13 mystical disks. The sacred sword, preserved in the Temple of Atsuta, in Japan, has 13 objects of mystery forming its hilt. When playing whist and many other games of cards each player has 13 cards and the pack is made up of four suits of 13 each.

Speed of Birds.

The speed of birds is often overrated. The swift, for instance, has been credited with a speed of 170 miles an hour, and the popular imagination compares the flight of a sparrowhawk with that of a cannon ball. The homing pigeon can be relied on under fairly easy conditions to make 60 miles an hour, or considerably more.

At Home.

The program at the Twentieth Century club was on Jean of Arc, her torments and imprisonment. A small boy had been allowed to accompany his mother and had seemed much interested in the program. On the way home he said: "Take me again, mother. I like that Penitentiary club."—Cartoons Magazine.

Satisfied His Curiosity.

An inquisitive young gentleman read this advertisement in a local paper: "Young man, some woman dearly loves you. Would you know who she is? Send postal order for ten shillings to Cecil Ditcher, mistress as below, and learn who she is." He sent the money and received this answer: "Your mother."—

Do It Now!

The good opportunity remains open for years, but they close with a bang, and they never reopen. We are responsible for the good we might do, and the world is poorer for our neglect, as no one can do our work. If there is something that needs doing, don't wait till tomorrow! Do it now!

Perfectly Safe.

"Now," said the physician to the patient who had summoned him, "you are not in a bad health, and I must forbid all work." "But, doctor," protested the patient, "may I not write some verses?" "Certainly," the doctor said, "write the verses you want to."—

The Leading Citizen.

Stranger—"Does this man, Amos Parry, hold any place of distinction in the village?" Villager—"Ye kin judge for yerself. When th' postman brings th' weekly newspaper down to Guy Parkinson's grocery store, Amos is the first reader!"—Life.

Iron Rust Proof.

To make ironwork proof against rust, heat it until it is almost red hot and then brush it over with linseed oil. This makes a varnish which, unlike ordinary paint or enamel, does not chip off.

Close Quarters.

Disappointed House Hunter—"I've brought back the keys of your maisonette—why, there isn't room in it for the child to have the mumps!"—London Opinion.

Although when free of color they are said to be of first water, diamonds are found in nearly every color of the rainbow—red, yellow, orange, green and blue.

Thing That Really Counts.

The great thing in this world is not so much where we are, but in what direction we are moving.—Oscar Wilde's fables.

Woman's Way.

Sometimes a woman would rather get nervous prostration than not to have her own way at all.—Galveston News.

Woman Architects in Serbia.

Belgrade, the Serbian capital, was the first municipality in the world to employ women architects.

Wrongs That Harm.

Not the wrongs done us harm us, only those we do to others.—Longfellow.

Gipsy Language.

The language of the Gipsies, Romany, is said to be Hindoo dialect derived from Sanskrit. Ethnologists pretty well agree that the Gipsies are descendants of an obscure Hindoo tribe. The popular belief that Gipsies are descendants of the Egyptians has no other basis than the similarity of the two words. The word "Gipsy" as a matter of fact is from the Bohemian, and means "traveller." The first Gipsies appeared in England early in the sixteenth century, but were found in eastern Europe at least two centuries earlier. They are now scattered all over the world.

World's Highest Peaks.

The highest mountain peak in North America is Mt. McKinley, in Alaska, whose altitude is 20,300 feet, and the highest in South America, Mt. Aconcagua, in the Andes, on the border of Chile and Argentina, 22,840 feet. The highest mountain in the world is Mt. Everest, in the Himalayas, in Asia. Its altitude is 29,002 feet. There are several hundred mountain peaks in the Himalayas 20,000 feet or over, running to an altitude of 28,278 feet.

Cruelty in Training Birds.

Performing birds are often taught by starvation. How many are aware that the pretty doves that fly when released to the beggarly artists, and form themselves into geometrical patterns on her head and outstretched arms, are often the sole survivors of hundreds which have been starved and then only fed when they perched upon an exact spot on the owner's arms.

Picturesque Lisbon.

Lisbon, the westernmost of European capitals, spreads itself in leisurely fashion over its 11 hills, extending for more than five miles along the shores of the famous Rada de Lisbon, and for more than three miles inland. Beyond the narrow channel leading out of the Rada through which flow the waters of the Tagus lies the open sea, and some 500 miles away over the horizon to the west are the Azores.

Science Awaits Inventor.

"Unbreakable" linen has long been the dream of many people, but although experiments have often been made, the way to weave an indestructible cloth is still unknown, and no one has claimed the fortune which is awaiting the inventor who solves the mystery.

Warsaw.

Warsaw is a very beautiful and imposing city as viewed from the castle at Praga, across the Vistula, and contains a number of magnificent palaces among which an ancient Saxon stronghold is the most notable. There also is the cathedral of St. John the Divine, a splendid example of gothic architecture, which dates from 1250.

Story of the Mirror.

From the twelfth to the fifteenth century small mirrors, carried in the pocket or attached to the girdle, were regarded as indispensable adjuncts to toilet articles. The pocket mirror was a peculiar shape of polished metal fixed in a shallow box and covered with a lid.

Yellowstone Wonders Discredited.

The first popular visit to that is now Yellowstone park was made in 1810 by John Colter, a trapper, who had returned there from hostile Indians. His tale of its wonders were absolutely discredited.

Roosevelt's Long Ride.

In February, 1900, the late former President Roosevelt rode 98 miles on his search for the seventeen hours between daylight and dark. The trip was from Washington to Warrenton and return. Three horses were used.

Check by Growl.

"Try taking celery each morning you will wash all poisons from stomach, leaving it pure and sweet, with racy cheeks."—Dudley (England) Herald.

Workers in the "dope" room of aeroplane factories are found to be affected generally with a mild form of anemia, but it is not sufficiently pronounced to be alarming.

"Y." of Course.

Before they were married she thought him a treasure, now she considers him a treasury.—Edinburgh Scotsman.

Uncle Eben.

"De amount of hurrin' a man wants to do," said Uncle Eben, "de mighty apt to depend on whether he's travelin' alone or drivin' a boss."—

Kidd a New Yorker.

The redoubtable Capt. Kidd lived about 200 years ago in a house that stood on the present site of 112-121 Pearl street, New York City.

Millions of Miles of Water.

The volume of water on the earth's surface is estimated at 315,000,000 cubic miles.

Optimistic Thoughts.

—

Camel Cigarettes

CAMEL Cigarettes meet your taste in many new and unusual ways. You quickly become fond of them—they are so refreshing and cool and fragrant.

You see, Camels are an expert blend of choice Turkish and choice Domestic tobaccos which guarantees the most delightful cigarette qualities that have ever been put into a cigarette. Your test will prove that you prefer the expert Camel blend to either kind of tobacco smoked straight.

Camels blend not only frees the cigarettes from any unpleasant cigarette aftertaste or any unpleasant cigarette odor but it assures that remarkable mellow-mild-body! And, you'll be interested to know that no matter how liberally you smoke Camels they will not tire your taste!

Camels are a cigarette revelation! Prove that yourself! We suggest right here that you compare Camels with any cigarettes in the world at any price for quality and for satisfaction!

Camels are sold everywhere in specially sealed packages of 20 cigarettes or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.

MANY TREES GO TO WASTE

Federal Official Points Out What Might Be Gained by Proper Utilization of Paper.

The amount of waste paper collected in all of Great Britain was about 1,000 tons a week in 1914. By 1918 this had been increased to 6,000 tons per week, or an increase of approximately 500 per cent, said H. L. Baldensperger, chief of the waste reclamation service, United States department of commerce, in a speech to the Federation of Women's Clubs.

"Waste material is the protector of our natural resources. Waste paper, utilized in the manufacture of other paper material, serves as a substitute for wood pulp. It requires eight trees of mature growth to produce a ton of paper pulp. Every ton of waste paper which can be substituted will save eight trees for other uses. In our urban centers we send annually to the dump approximately 13 tons of usable waste material for every 1,000 inhabitants, and 20 per cent of this tonnage is made up of waste paper.

"Based upon the approximation of the present population of our country, we are sending annually to the dump at least 170,000 tons of waste paper, or twice as much paper as was collected in all of Great Britain in 1918. This amount represents the substituted power for at least 1,200,000 trees of mature growth."

NEVER-FAILING DEATH TEST

Discovery of French Physician That Is Acknowledged to Be of Highest Importance.

Uncertainty as to whether a person be alive or dead is especially great on the battlefield, and prompt decision in such cases is far more important than in civil life. Dr. A. Terson has just recommended to the French Academy of Medicine a new test, those already known having proved insufficient. The best of these latter has been the injection of fluorescein, as devised by Icard. But even this is uncertain, for in some cases men who are still alive do not show the green coloration of the whites of their eyes following injection, which the test is supposed to produce.

Doctor Terson recommends placing in the eye a minute quantity of a 33 per cent solution of dionin (ethyl-morphine), glycerin. If death has already taken place, nothing happens, but if the man has the slightest trace of life still in him the white of his eyes will immediately turn purplish-red and swell, but this inflammation will disappear rapidly and leave no ill effect.

Test of Sanity.

In the case of a very brutal murder, anger at the deed will sometimes cause a jury to reject the clearest evidence that the perpetrator was insane. The late Lord Kingsburgh, better known as Sir J. H. A. Macdonald (formerly lord justice clerk of Scotland), whose death was announced a short time ago, could give a striking example. I once defended a case," he wrote in his "Life Jottings," "and a majority of the jury not only convicted, but added a rider affirming that the prisoner was sane. The man was hopelessly mad. The doctors sent to see him were satisfied of that, and the sentence was not carried out. A crucial test applied was that while one of them put his finger lightly on the pulse, the other suddenly said: 'By the by, Miller, when is it you are to be hanged?' There was not a tremor or a change of countenance or acceleration of the pulse, and, looking up, he said, quite simply, 'I think it's Tuesday week. If I'm not mistaken.'"

The Little Prude.

A New York literary agent was talking about Alfred Noyes, the English poet, who recently wrote an article to prove that many of his brilliant poems are immodest in their verve.

"Noyes," said the agent, "was always a bit of a prude. Yes, even in childhood the unhappy trait manifested itself.

"Once, when he was four years old, Noyes had just got out of his bath and his nurse was advancing on him with a bath towel when the door opened and his aunt entered.

"The youngster flew into a prudish rage.

"Get out," he screamed. "Get out right away. What do you take this for—an art gallery?"

Complete statistics of the output of hydraulic cement in 1918 compiled under the direction of Ernest F. Burchard of the United States geological survey, indicate a marked decrease from the output in 1917 and show that the production of Portland and other cements in 1918 was the lowest since 1900.

The decrease in output was the effect of the war restrictions imposed by the government upon fuel supplies, transportation facilities, labor and private construction in general.

Scotland Turning to Peace.

In Scotland the progress from war to peace is proceeding at an active pace. One firm is now specializing in the manufacture of internal combustion engines suitable for fishing boats, a class of machinery mainly imported before the war. In the northeast a munition factory has turned to the manufacture of chocolate-making machinery, an industry formerly claimed by Germany, while in Glasgow toy making has superseded war material and gives employment to numbers of discharged soldiers.

When Tobacco Was Taboo.

In 1638 the Massachusetts general court ordered, a writer comments, "that no man shall take any tobacco within 20 poles of any house, or so near as may endanger the same." In 1768 an act was passed forbidding the carrying of fire through the streets except in a covered vessel, smoking, or having in one's possession "any lighted pipe or segar" in the streets, or on the wharves. The penalty was \$2. If the offender was in a ropewalk, the penalty was from \$5 to \$100. This prohibition of 1768 was not repealed until 1880.

Deaf and Dumb Language.

The Encyclopedia Britannica says: "We have conversed by signs with deaf people from all parts of the British Isles, from France, from Norway and Sweden, Poland, Finland, Italy, Russia, Turkey, the United States and found that they are indeed a world-wide means of communication. Deaf people in America converse with Red Indians with ease, thereby showing how natural the generality of even deaf-mute signs are."

Steel and Iron.

Steel is a kind of iron which can easily be hammered out thin without cracking and can be made extremely hard by being heated and then cooled quickly. It is different from ordinary iron because of the amount of carbon in it. Wrought iron contains less carbon than steel and so it cannot be made so hard; cast iron contains more and so is brittle.

Guarded Natural Resources.

"The Indians of Kentucky," says Dr. Clark Wissler, "were in the habit of burning off forest areas regularly so as to provide pasture for the buffalo, thus enticing him to remain in the country." Again, the Indians living in the regions where wild rice grows, were observed to take certain precautions to protect the rice beds, even to facilitating their growth."

To Drive Moths From a Piano.

When moths get into a piano the best means of ejecting them is to make up a mixture of turpentine, benzoline and oil of lavender, and squirt this inside the instrument with a scent spray. Use seven parts of benzoline to one of turpentine; add a few drops of lavender to each ounce.

The Husband in Charge.

Wife—"Considering how long I've been away, I think you might have made some preparations to receive me." Husband—"You do me injustice, my dear. I have had the library and parlor thoroughly cleaned and aired." Servant (interrupting)—"Please, sir, the man has come with a barrow for them empty bottles."

A Nincompoop.

"Nincompoop" is a most entirely satisfying and refined way of calling a person a fool or blockhead or a simpleton. It is a corruption of the Latin phrase "non compos mentis"—not sound of mind. Besides being satisfying and refined it has a classical origin in addition.

Dogs of War.

On July 28, 1873, General Zachary Taylor, afterward president of the United States, requested the government to furnish him with bloodhounds to be used in hunting the Seminole Indians of Florida. He was furnished with the dogs.

Taking Up Our Time.

Sometime we are going to figure up how many hours a day of our telephoning time is devoted to listening patiently to sweet voices saying that they know they ought not to disturb us at our work.—Ohio State Journal.

Chance for Inventors.

A prize of \$10,000 is offered by the Walnut Growers' association to any one who will invent a satisfactory machine for branding the shell of each English walnut in a yearly \$10,000,000 crop.

Not Done in That Reckless Way.

Minden Courier—"A few years ago Mr. — spent \$2.50 for advertising without drawing any crowd to his store, so he is convinced that it doesn't pay."—Boston Transcript.

When it is a man getting a set of false teeth, he is afraid he is not going to be able to eat with them; if it is a woman, she is afraid she will not be able to talk.

—Houston Post.

The Truly Wise.

He who has obtained any amount of knowledge is not truly wise unless he appropriates it and can use it for his need.—Dr. John Brown.

Delicate Anemone.

Anemone means "windflower," and is so called because it is so delicately poised that it sways with the lightest motion of the atmosphere.

Daily Thought.

Words and feathers the wind carries away.—Herbert.

Country's Largest Coal Market.

New York city is the largest coal market in the United States.

ALPS HAD THEIR REVENGE

Famous Airman Who Had Defied Great Mountains at Last Meets His Death There.

Few of the men who have given their lives to the air have met a more impressive end than the handsome, golden-haired young Captain Natale Palli. He was the favorite pilot during the war of Maj. Gabriel d'Annunzio, the Italian poet who became one of the greatest airmen.

Palli evidently had motor trouble when right over the Alps. With extraordinary skill he landed his machine on a glacier 9,000 feet high. Getting out of it unhurt, he started to climb down the mountain side. A snowstorm soon set in around him, but on he plodded through the blinding drifts towards the little village of Bourg St. Moritz, in the valley below. For a whole day at least he stumbled forward, without food and pierced by the bitter cold.

Then, when he was 200 yards from a mountain hut, and within sight of the Alpine village, his strength gave out and he sank down into the snow. His courage urged him to another effort; the snow was found with the marks of his struggles to rise again. But he could do no more, and there, two days later, a passing peasant found the gallant young Italian pilot lying with his head on his arm as if asleep, half-covered by the snow, and without a bruise on his body.

So did the Alps which he had conquered revenge themselves upon Natale Palli, who had escaped death in 140 raids over the enemy lines in war.

EASY TO IMPROVE MEMORY

Whole Secret is to Concentrate the Mind Entirely on the One Thing in Hand.

People of poor memory are generally inattentive and fail to concentrate. Systems like Pelmanism help to good memory in that they focus the mind on the thing at hand. Dreamers read, and for the life of them cannot tell what the last sentence was, unless it was something in which they were vividly interested waking them out of their dream, and then it is fixed for good, thus showing that memory is conditioned on attention and concentration. To cure this requires heroic treatment. Make it a religious resolve to attend only to the thing in hand. If it is reading, concentrate on the book so thoroughly that every sentence takes clearly defined meaning in the mind. One cannot think of something else and at the same time understand and remember what he is reading. The trick in the game of memory is to overcome dreaming, abstraction, inattention. It can be done by persistent, patient, long-continued effort.

Getting Acquainted With America.

The United States has been getting the greatest advertising during the last two years that any nation has ever received, and the results of this should be reaped in foreign trade. Just as any merchant obtained custom from an advertising campaign.

Since the beginning of the war there has been a steady stream of foreign missions on tour in the United States, headed by men of prominence in their respective countries. They have visited the shipyards, the steel mills, the camps and the industrial cities, and they have seen the miles of fertile farm lands and gained a new conception of the vastness of America and its ability to put over big things on a big scale. A convention of the League of Nations in Washington will add still more to this world knowledge of America's resources. The chief thing now to be sought is the holding of the advantage gained.—Ferber Magazine.

Big Brother Movement.

The "Big Brother" movement was started in 1904, by Ernest K. Coulter, in New York city. Since that time the work has been taken up in over 100 cities. There is a staff of paid workers, supplemented by volunteers—lawyers, physicians, merchants, etc. The object is to obtain the cause of the boy's troubles—whether it be truancy, stealing, lying, running away from home, etc. Then with the cooperation of parents, through the medium of the "Big Brothers," an effort is made to build up within the boy a sense of honor and good citizenship. The headquarters are at 200 Fifth avenue, New York city.

One result of the bolshevist law that persons who are employed cannot be removed arbitrarily is instanced by the Bulletin Russe, published by the League for the Reorganization of Russia at Lausanne, Switzerland. It declares that at Smolensk a bachelor had a cock whom he wished to discharge. She refused to leave her place and he was unable to turn her out. On the advice of a bolshevist friend the bachelor married his cock and immediately afterward divorced her. As a divorced woman she was legally compelled to leave the premises.

Prevalency of Deafness.

The last census showed that there are in the United States 89,287 persons who are totally deaf. Dr. Wendell C. Phillips of New York told the Philadelphia College of Physicians recently that in New York city there are at least 100,000 persons more or less deaf.

Truth About Cat's Eyes.

A cat can see better in the dusk than can a human being because the cat's eyes are sensitive to ultra-violet rays. Its pupils are capable of greater expansion than those of man's or of almost any other animal, thus admitting more light. The cat uses its whiskers for feelers in the dark. Its sure-footedness is a great help to it. So it gets along better in the dark than most animals. The belief that it can see by night with the same degree of clearness as by day is, however, erroneous.

Fish Eat Other Fish.

When a codfish eats it takes an oyster in its mouth, cracks the shell, digests the meat and ejects the shell. Crabs crack the shells of their smaller neighbors and suck out the meat. This accounts for the mounds of shells which are found beneath the waves. And, as further illustrating the constant destruction going on in the ocean's depth, it is said that if a ship sinks at sea it will be eaten by the fish with the exception of its metal portions.

Long Railway Tunnel.

The longest railway tunnel on the American continent is the Rogers Pass tunnel on the Rocky Mountain division of the Canadian Pacific line, which is five miles in length and runs under Mt. Macdonald, in the Selkirk range. It was constructed at a cost of more than \$10,000,000. Previous to its being put through, the Hoosier tunnel on the Fitchburg division of the Boston & Maine railroad, 4½ miles in length, was the longest tunnel in America.

China's Water Transportation.

On the rivers, streams or canals of China transportation and postal facilities depend on the sampans. Women, as well as men, operate them all day and the prehensile foot renders their task much easier. Every Chinese postman, lying on his boat, steers with his hands and rows with his toes. He holds the oar strongly between the great toe and the others and gives a vigorous motion to the boat by the powerful action of the leg muscles.

Only Real Riches.

There is no wealth but life; life, including all its powers of love, joy and of admiration. That country is the richest which nourishes the greatest number of noble and happy human beings; that man is richest who, having perfected the functions of his own life to the utmost, has also the widest helpful influence, both personal and by means of his possessions, over the lives of others.—Ruskin.

Milton and Italy.

How delightful was Italy to Milton! His Allegro and Penseroso show that he could fully appreciate both its "mirth and its majesty." He returns not the less to live out a career of illustrious service in his own country, where his brave heart and philosophic mind were of more avail to his time than even his sacred song to ours.—Julia Ward Howe.

Submarine Coal Mines.

There are many submarine coal deposits off the British Isles, but so far they are not much worked. The tunnels of the mines at Whitehaven extend some four miles from shore under the Irish sea, however, and there also is some submarine coal mining at Bolness near the Firth of Forth and at Monkwearmouth in Durham.

Gathering Life's Gold.

The gold of life does not lie hidden in mines; it sparkles in tiny sands all along the common path of every day. He only who gathers it bit by bit from daily duties and pleasures and opportunities and friendships will find himself the possessor of the real treasure at last.

For the Teacher.

No one is too young or too old to be impressed with the fact that obedience is the law of life. Show its rewards and its test of discipline. When one wills to obey, he throws into gear machinery the like of which is not known anywhere else on earth.

The longest time during which a note has remained outside the Bank of England is 111 years. It was one of £25, and it is computed that the compound interest during that long period amounted to no less than £6,900.

Happiness Always Right.

Let us never be afraid of innocent joy. We must dare to be happy, regarding ourselves always as the depositaries and not the authors of our joy.—Amiel.

Education the Only Road.

Education alone can conduct us to that enjoyment which is at once best in quality and infinite in quantity.—Horace Mann.

Leather-Lunged.

"Hold on, William," commands voice in patent-leather shoes, running down the stairs all pink with speed.—Pearson's Magazine.

Daily Thought.

Honest bread is repulsive to the better that makes the dishonest bread so repulsive.

The WISE PIPELESS FURNACE
BRINGS REAL COMFORT TO YOUR HOME

The WISE Pipeless Furnace

Made by THE WISE FURNACE CO., Makers of the Celebrated Line of WISE Furnaces—Largest Exclusive Furnace Manufacturers in the United States

A Heater With a Name Behind It

THE WISE PIPELESS is the greatest step forward made in the One Pipe Furnace Construction. It is made in the same substantial way and with the same high-grade materials as the regular well-known and popular guaranteed WISE Furnace. It is backed by 10 years of brilliant better Furnaces, and the trade-mark of the Wise Owl is your guarantee of a heater that will not only increase the efficiency and comfort of your home, but will add to your happiness in the years to come. The saving in fuel and repairs alone have made thousands of warm friends of the WISE

American Institutions Are Not Crumbling== Go Back to Work.

This is no time to talk revolution. It is un-American to make a "direct drive" at American Industries and Institutions. Thousands of our boys went across the seas to stop the Hun hordes from destroying the world. Stop this movement that is here now to spread fear and starvation and strife in the land we love so dearly.

Get your job back. Be a man, faithful to your post of duty. Do your bit to help the government reduce the cost of living. Why strike when the President of the United States appealed to the leaders to hold off for an investigation.

Join the loyal workmen determined to make our industries go. The mill gates are open to welcome every man who aspires to be a good American. Go back to work.

(Lithuanian)

Amerikas esa išauktas.

Tas ne esa paprastas strąkas. Tas eas velniškas darbas ne didelės kuopos radikalu katrie nor patraukt in varsa darbininkus ir padarit revoliucija šitam krauje.

Ar Jus abejojate? Persiskaitkite šimtas iš laikraščio Sindikalistu, ir va strąkeru:

"Tas krutumas Sindikalistu esa tiesiog priešinąs demokracijai ir Rundui."

"Krutumas Sindikalistu tiesiog esa priešinąs demokracijai ir Rundui." Ar tas nera gana aišku? Jus stovite prieš sunku uzdayima. Čionai nera paprastas strąkas. Amerikas yra pašauktas kovoti. Čion turi butie padaritas tikras darbas del pabalimo tokio padejimo. Toksai darbas Radikalu storiojesi sunišditi liuosybe Amerikieciu ir patraukti kraju in toki gati padejima kaip Rossijo, kad žmones klastu neišpasakomas mukas, bada ir smerti. Prie to ne galima daleistie.

Tauta šito krajaus ne reikalauje revoliucijos ir ne reikalauje "Rusku Sovietu"; tauta reikalauje Amerikansko gyvenimo po Amerikos Rundui.

Žinote gana gerai kaip Vokietijai sunišdiju Fabrikus Francijo, Belgijo, Serbiju. Rossijo ir kitose žemes laike kares.

Ne darikite nieko kas gelbetu Vokietijus gaut viršu kovoj su Ameriku ape Fabrikiniu išdarbiu. Žiurekite kad Amerikai eitu darbai prigulintai ir pasekmingai, ir

Grizkite prie darbo.

(Polish)

Ameryka wezwana

To nie jest zwykły strajk. Musimy nań się patrzyć i uważać takowy za iście dyabelski zamach grupy radykałów, którzy chcą rozbić i ~~destruować~~ robotników i zaprowadzić rewolucję w tym kraju.

Czy ty wątpisz w to? Przeczytaj sobie te kilka wypisów z opublikowanych artykułów Syndikalistycznych pamfletów jednego z przewodniczących tego strajku:

"Syndikalizm widzi w rządzie tylko narzędzie opresji, nieodpowiedzialą i niezaradną administracyę przemysłu i propenuje usunięcie takowego zupełnie ze społeczeństwa."

"Syndikalistyczny ruch jest radykalnie przeciwdziałający demokracji i rządowi."

"Radykalne przeciwieństwo demokracji i rządowi" — Czy jestto dosyć wyraźnie określone. Musicie po prostu to przyjąć tak czy owak.

Nie jest to zwykły strajk — Ameryka jest wezwana do walki. Bierne patrzeć na sprawę tą nie może być więcej tolerowane. Czas obecnie przyszedł na stanowczą działalność. — Żmija radykalizmu która zabija zwyciężoną Amerykańską wojnę i pochłonięła kraj ten w chaos któryby sprowadził podobne nieobliczone cierpienia, głód i śmierć jak w Rosji, musi być bezwarunkowo zgniecioną.

Obywatele tego kraju nie chcą rewolucji. Nie chcą ani rządów Rosyjskich Sowietów. Chcą tylko Amerykańskiej wolności i swobodnego życia pod rządami Amerykańskimi.

Jest wam wiadomem jak Niemcy ~~zburzyli~~ przemysł i handel Francji, Belgium, Serbii, Rosji i innych krajów Europejskich podczas tej strasznej wojny.

Nie pozwólcie na to, aby jakikolwiek uczynek z waszej strony przyczynił się osiągnięciu przez Niemcy przodownictwa w przemyśle i handlu światowym, obecnie, gdy ta straszna wojna została zakończona. Trzymajcie Amerykę zajętą, i w dobrobycie, i wskroć Amerykańską.

Powróćcie napowrót do Pracy.

YOUR JOB and YOUR PAY

(Russian)

AMЕРИКАНИЗМ.

Это не есть обыкновенная забастовка. На неё надо смотреть как чертовское усилие небольшой группы ~~радикалов~~ стремиться разстроить работу и образовать революцию в этом крае.

Вы в этом сомневаетесь? Прочитайте ниже приведенные выписки из Синдикалистического Журнала, написанные одним из вождей забастовки:

"Синдикалисты видят в Правительстве орудие притеснения, не позволяя администратору индустрии и предлагая устранить его из будущего общества."

"Синдикалистическое движение есть совсем противоположное демократии и правительству."

"Совсем противоположное демократии и правительству." Это довольно ясно. Вы находите в положении четырёхугольника. Это не есть обыкновенная забастовка. Америка получила вызов. Пассивное равнодушие тут не на месте. Теперь подошло время для окончательного агрессивного действия.

Этот единственный радикализм может разстроить Американскую свободу и бросить край в такой хаос, как в России и повлечь за собою неслыханные страдания, голод и смерть. До этого нельзя допустить даже.

Американский народ не желает революции. Не нуждается в "Русских Советях", он хочет жить американской жизнью и пользоваться покровительством Американского Правительства.

Вам известно как Немцы разстроили Фабричный промысел во Франции, в Бельгии, в Сербии, в России и в других краях во время войны.

Не допустите же до того, чтобы Вы собственными действиями помогли Немцам выиграть индустриальную войну с Америкой, когда всемирная война уже окончена.

Поддерживайте Америку, помогайте ей в успехе и Возвращайтесь к работам

(Italian)

L'America viene sfidata!

Non è questo uno sciopero ordinario — Al contrario esso dovrebbe essere considerato come il diabolico tentativo di un piccolo gruppo di rivoluzionari per portare lo scompiglio nel campo del lavoro e accendere la rivoluzione in questo paese.

Ne avete qualche dubbio? Leggete i seguenti periodi estratti dagli scritti Sindacalisti di uno dei capi di questo sciopero:

"Il Sindacalista considera lo Stato come uno strumento di oppressione, un amministratore delle industrie e dovrebbe perciò essere escluso dalla futura società."

"Il movimento Sindacalista è radicalmente opposto alla Democrazia ed allo Stato."

"Radicalmente opposto alla Democrazia ed allo Stato. Non è questa espressione abbastanza chiara? Voi potrete anche affrontare la questione apertamente. Questo non è uno sciopero usuale. Questa è una sfida all'America. L'indifferenza passiva non è più possibile. È giunto il tempo per cominciare una campagna aggressiva. Questa vipera del Radicalismo mira alla distruzione della libertà Americana e buttare la nazione nelle tenebre, causando sofferenze immaginabili, causando gli effetti già avuti in Russia, la fame e la morte. Per tal ragione questo movimento dovrà essere sconfitto."

Il popolo di questa Nazione non vuole la rivoluzione. Esso non vuole i Sovietti Russi. Esso vuole solo regime americano e libertà sotto la protezione del Governo.

Voi sapete come la Germania distrusse le industrie della Francia, del Belgio, della Serbia, della Russia e di altre nazioni europee durante la guerra.

Fate in modo che nessun vostro atto possa aiutare la Germania a vincere sull'America questa battaglia industriale, ora che la guerra è finita.

Mantenete l'America occupata nel lavoro, fatale prospera, siate sincero Americano.

Ritornate al lavoro.

(Slovak)

Amerika je vyzvaná!

Toto nie je obvyčajný strajk. Ba treba naň hľadať, ako na diabolský krok niekoľkých radikálov, chcúcich disorganizovať robotníctvo a tak siahť revolúciu v tejto vlasti.

Či vy tomu neveríte? Prečítajte si týchto pár výťahov a brožúry "Syndicalist", napísanej a vydannej jedným z vodcov tohoto strajku:

"Syndikalista vidí v štáte len inštrument utlačania, tárajúceho administrátora industrie a navrhuje ho vyhnúť z budúcej spoločnosti ľudskej."

"Syndikalistické hnutie je radikálne proti demokracii a štátu."

"Radikálne proti demokratizmu a štátu."

Či je to dost jasné? Teda dobre bude, keď nahliadnete do situácie dobre. Toto nie je obvyčajný strajk. Amerika je vyzvaná. Na toto nesmiete sa dívať nečinne. Nastala doba rozhodného činu. Tento jedovatý had radikalizmu, ktorý chce zničiť americkú svobodu a vrátiť túto vlasť do chaosu, ktorý zapríčinil neopísateľnú biedu, hlad a smrť v Rusku, musí byť porazený.

Občania tejto vlasti nechcú mať revolúciu. My nechceme ani počuť o vládě, akou je ruská sovietska vláda. My chceme len americký život a svobodu pod americkou vládou.

Vy znáte, ako Nemci zkazili industrie Francie, Belgicka, Srbska. Ruska a iných európskych krajín počas vojny.

Nedopusťte, aby ste svojím činom pomáhali Nemcku vyhrať industriálnu vojnu proti Amerike teraz, keď je po vojne.

Držte Ameriku zamestnanou, prosperujúcou a americkou.

Chod'te nazad do roboty.

(Magyar)

Amerika ki van hívva.

Ez nem közönséges sztrájk. Inkább kell ezt tekinteni a radikálisok egy kis csoportja ördögis kísérletének, melyvel akarják a munkásságot megzavarni és ebben az országban forradalmat előidézni.

Kétségséges-e ezt? Olvassa el ezt a néhány kiadványt egy sztrájk vezető szindikalisztikus iratából.

"Szindikalista látja az államban az elnyomás eszközeit, ipar vezetésének a kontárkodását és próbálja azt jövő társadalomból kiköszöböltetni."

"Szindikalista mozgalom radikálisan ellenzi a demokráciát és az államot."

"Radikálisan ellenzi a demokráciát és az államot".

Élég világos az? Legjobb ha az állapot szemébe néz egyenesen. Ez nem közönséges sztrájk. Amerika ki van hívva. Tűrő nemánomság többé nem segít. A végleges hathatós cselekedetnek az ideje megkezdett.

A radikalizmus ezen viperáját, mely megsemmisítene az amerikai szabadságot és az országot dobna zavarba, mely okozott kimondhatatlan szenvedést, éhezést és halált Oroszországban, tönkre kell tenni.

Ezen ország népe nem akar forradalmat. Nem akar orosz Söviétet. Ő akar csak amerikai életet és szabadságot amerikai kormány alatt.

Önök tudják hogy Németország miként megbénította Franciaországot, Szerbia, Oroszországot és más európai országok iparát a háború alatt.

Ne engedjék, hogy hármelyik tettei segítsék Németországot meggyerni az ipar háborút Amerikából most, midőn vége van a háborúnak.

Tartsák Amerikát tevékenységben, jólétben és amerikaiaknak.

Menjenek vissza a munkába.

WAS RUN-DOWN DUE TO A BAD STOMACH

Mrs. A. Vogel of Pittsburgh
Tells How Ten-Herbs Re-
stored Her Health

"An attack of indigestion or dyspepsia are in themselves the simplest ailments imaginable," said the Ten-Herbs Man, "but if the truth were known they would be found to be even more dangerous than some of the most terrible fevers. They may be trifling, but they are a never-failing sign that the stomach is not performing its proper functions."

"When the stomach is not properly digesting the food, there is no limit to the way affections can spread to every organ of the body, producing intestinal poisoning, rheumatism, liver and kidney trouble and many other distressing ailments."

"Ten-Herbs, the famous herbal stomach remedy, is invaluable in aiding such cases. It acts almost like a miracle, purifies the blood, causes the food to digest perfectly and puts the entire system in a strong, healthy condition, and we are daily in receipt of signed statements from well known local people verifying this contention."

"Only the other day Mrs. A. Vogel, a popular Pittsburgh lady, residing at No. 106 Holzer street, gave the following:

"I have had trouble with my stomach for the past three years. was bloated with gas, could not digest my food, had headaches and was so nervous could not sleep; my back pained me terribly and I got in a really run-down condition. I would have awful distress after eating any food. Since I have taken Ten-Herbs I am feeling fine, sleep well and am able to get my meals and digest them. I feel stronger and better in every way." Ten-Herbs is sold in Charleroi at Henning's Drug Store.

WILL BE WITNESS IN MURDER CASE

Upon petition of the district attorney of Allegheny county, the Washington county court has made an order allowing one Andrew Jones, alias Robert Johnson, to be taken from the Washington jail to Pittsburgh to testify as a witness in the case against Jack Thompson, who will be tried in Pittsburgh this week on a charge of murder. Jones is a material witness in the case.

It is only two weeks until the general election and candidates as a consequence are usually busy at the present time.

WHAT IS INDIGESTION?

AND WHY IS IT?

One of the simplest things to explain but how hard to manage! Indigestion is a very very mean condition but easily corrected if you can get the proper method. BA-HA-NI, try taking one with your evening meal, just one BA-HA-NI and see how soon your food begins to digest. Don't wait until you're in bed. Stop improper digestion away. Let BA-HA-NI clear your way for better health! Have indigestion and enjoy your meals. You can get BA-HA-NI from Henning's Drug Store and all druggists.

NO RESIDENT HAS NARROW ESCAPE

At work, my limbs became numb, I got dizzy and faint, my ears were stopped up. I had been treated with gas on my stomach, severe bloating after meals. Doctor failed to help me. One dose of Dr. Williams' Wonderful Remedy, recommended by the corner druggist, was a life-saver to me. I am coming with it with splendid results. It is a simple, harmless preparation which removes the catarrhal mucus from the intestinal tract and allays inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. It will convince or money refunded. At druggists everywhere.

A Real Remedy.

A soldier went to a "quack" doctor and complained of a sharp pain after sitting on damp grass for some hours during which he had frequently sucked the point of a lead pencil. The "quack" told him that he was suffering from "plumbism" and gave him some pills. The next day he returned to the "quack" and said, "You told me I had 'plumbism,' which is lead poisoning, and I now find there is no lead in lead pencils, only graphite or plumbago." "Oh," replied the "quack" airily, "did I say plumbism is the cause of your plumbism? I meant to have said plumbago is the cause of your plumbago." "Oh," said the man, "But, anyhow, your pills are only bread." "Of course," replied the "quack," "Don't you know that bread is the finest thing to remove pencil marks with? You didn't want me to give you India-rubber pills, did you?"

Smallest Honey Bees.

In some of the East Indian Islands, and on the mainland of Hindustan, are to be found the smallest race of honey bees in the world. These dwarf honey collectors are known to entomologists as apis florea. Their honey combs are no larger than a child's hand, and the cells are about the size of a small pinhead. This honey is excellent, as is the wax. The little creatures build the combs on the branch of a tree, and as they have not to provide for winter, they work all the year through, raising broods like themselves. In the same land there is a race of giant bees, apis dorsata, as large as a field cricket. These monsters of the bee world build honeycombs that are from six to seven feet in length, four or more in width, and which weigh from 100 to 100 pounds each.

The "Flying Dutchman."

Perhaps the best known of all sea ghosts is the Flying Dutchman. The tradition goes that a Dutch sea captain, Cornelius Vanderdecken, was bound from Batavia, in endeavoring to round the Cape of Good Hope he met with such baffling head winds that after nine long weary weeks he hardly shifted his position. In a fit of passion, Vanderdecken cursed God, and vowed by heaven and hell that he would round the Cape if it took him till the day of judgment. For his impiety he was doomed to beat to and fro for all time, and the phantom ship has been reported many times, certain misfortune being expected on any vessel who sights her.

Learning What to Kill.

Did you ever stop to think when you put your foot down to crush a little insect that you might be taking the life of something very valuable? Even the little beetles and roaches and snakes, which I know you don't like, according to our naturalists are doing a good work, destroying insects that are harmful to our crops, our vegetables and even our pretty flowers. The snake really eats so many poisonous insects that he is like nature's policeman sure enough. Some one has suggested that each boy and girl call themselves members of a protective association, and see how many little harmless lives they can protect everyday. Always be sure before you kill anything is the best plan.—Kansas City Star.

Only One Way.

The mild young gentleman, having read that every man ought to have a knowledge of self-defense, betook himself to an instructor of boxing, arranged terms, took off his jacket and vest, put on the gloves and started to learn things. "This," said the professor, "is the way you do it." With that he landed the pupil a sounding thump under the jaw. When the pupil recovered consciousness he said, "May I ask whether it was necessary for you to knock me down like that?" "Not at all," said the professor; "far from it. There were three hundred and forty-four other ways in which I could have knocked you down."

Where Men Embroider.

Embroidery might be called the household industry of Japan, and it is an industry—or an art, perhaps one would better say—that has been handed down in the same families for many generations. Men, as well as women, are engaged in the work, which is done in the homes or in small shops where there have a few apprentices, usually from twelve to ten, and a number of skilled embroiderers. The majority of the workers are men who have been trained as apprentices to produce the finer grade of work which is demanded by the Japanese people. There are probably about 1,500 in all now engaged in this industry, according to a recent estimate. Women do embroidery at home in some parts of Japan. This is done by the piece-work system, upon which payment is based. The contractors supply their workers with the materials needed, although sometimes the wholesale dealer at tends to this directly.

Capt. Klaus Larson, in his little motor boat Foo, made a successful trip from the foot of the cataract through the Whirlpool rapids of Niagara falls on September 19, 1910. Despite the battering of the Whirlpool rapids Larson went through safely; the little boat was lost to sight most of the time, but at Great Wave it was shot 20 feet out of the water. Except the old Maid of the Mist, sent through in 1864 to avoid seizure, Larson's is the only engine-propelled craft to have gone through the rapids.

All in the Point of View.

A young lawyer in Florida was running for office, says Everybody's Magazine, and undertook to cultivate the acquaintance of all the country people for miles round—with the idea of getting votes. One evening he stopped his horse in front of a little cabin and inquired of the old man at the door whether he might spend the night at his home. "Sure, partner," said the old man. "Stop and light." The lawyer followed him into the cabin. There was only one room, and in a corner of it was stretched a bearskin, the trophy of a hunt, and the only bed of the hunter. A pumpkin served as a pillow. In answer to the lawyer's inquiring look, the host pointed to the bearskin and said with great magnanimity: "Stranger, I tell ye what we'll do—ye take the pumpkin and the bearskin, and I'll rough it."

To Keep Christ Warm.

Among the Vlachs—an ancient people widely scattered over the central Balkans—a big fire is made in each house on Christmas eve, to keep Christ warm. The ashes are not swept out of the hearth until Epiphany, and meanwhile the fire must not be allowed to go out. Boys go round and knock at door after door with a stick, in response to which gifts of cakes and nuts are bestowed upon them. Their leader carries at his waist a long string, on which he threads the cakes—the latter being shaped like doughnuts, with holes through the middle. The family Christmas cake is a huge affair, decorated with currants and sesame seeds. After being sprinkled with a few drops of holy water, it is broken into pieces and given to the sheep, horses and other domestic animals, to keep them in good health.

Mothers and Children.

No one can tell us exactly the things it is best to do with children. But if we begin to watch and think, read when we can and exchange experiences with other mothers, many suggestions will be found to meet our needs. Take a glimpse backward into your own childhood and many ideas will occur to you in that way. And through it all we will find that the children are helping to bring us up, too. Courage and joy prolong life, and we can well afford to stand and wait, feeling sure that if our motives have been right, and we can find something to love even in the hard things of life, our little ones will see and know, and will "rise up and call us blessed."—Exchange.

Ahead of His Time.

The dream of John Wise to cross the Atlantic in an airship was never realized, and yet that dream has become an actuality almost a half century after this intrepid navigator, of the upper air made his last fateful voyage. As far back as 1843 Wise petitioned congress for an appropriation to finance his project looking to cross the ocean in a balloon which he designed for long distance journeys. For eight years he appealed in vain, the reasons given being that his propositions were not practical and that money invested in such a project would be thrown away and the lives of those who made the attempt would be sacrificed to the ambition of a visionary enthusiast. In 1871 Wise again came into the public eye by again asking congress for an appropriation sufficient to build an airship from which explosives could be dropped on an enemy either on land or sea. The same treatment was accorded to the inventor as he had received for his other projects. In 1879 Wise and several companions made an ascension at St. Louis, and were never heard of afterward.

City girls of any class rarely if ever have any domestic education or training, unless they get it in their schools. They are taught the boundaries of the United States and the source of the Nile; they learn that if you buy products at a certain price and sell at a higher you make money, but what to do with the money when you make it no one discusses. It is all making money or things, never the right use of money or things, that is impressed upon boys and girls from their primary class on to the bitter end. The children of well-to-do families in smaller places have opportunities for education in the real things of life which these others often lack, but since our grandmother's day education and training in home affairs within the home walls has been neglected to a dangerous degree.—Woman's World.

Nova Scotia's History.

When discovered by the British in 1497-98 Nova Scotia was not named. A few years later it was settled by the French, who called it Acadia. It passed to the English by the treaty of Utrecht, in 1713, and they changed the name from Acadia to Nova Scotia. This name was first used in a grant made by King James I, who was born in Scotland, and chose a name in honor of his native country. The royal grant under the name was made to Sir William Alexander, a Scotchman, who wrote poor poetry, and was created Lord Stirling by King James.

Borrowed Dignity.

She—"Doesn't Charles look distinguished in that full-dress suit?" He—"How could he help it? That outfit in its day has been on the backs of three football captains, two editors and the leading man in our last college production."—Stanford Chaparral.

Ireland Still Medieval.

In Ireland we are still medieval, and think that how to live is more important than how to get a living. When I was a young man if I announced that I intended next morning at break of day to start on some enterprise of amusement, or it might be of high duty, the whole family would get up to see me off; but if it were on some matter of more commercial gain, I would breakfast in the care of the servants. It was thus through the whole of Irish life.—J. A. Butler, Yeats.

The Unknown Quantity.

When a thing like that happens a man does not know exactly where he is or how he feels. The largeness and the smallness of the world amaze him; the mystery of life bewilders him; he is confused in the presence of the unknown quantity. How he behaves, what he says or does, depends entirely upon instincts beyond his control. This is what happened to Richard when he heard the voice of Carol.—Henry Van Dyke.

Oldest Living Thing.

The oldest living thing in the world is thought to be the famous cypress in the churchyard of the village of Santa Maria del Tule, a few miles from Mexico city. Experts have estimated its age as between five and six thousand years. It is said to have been a sapling two hundred years old when Cheops built the great pyramid.—Exchange.

To Repair Book Covers.

Beautiful books are generally bound with leather, and if they are in constant use the calf or morocco soon becomes worn. To remedy this, use equal quantities of white of egg and water beaten together, apply with a soft brush or piece of flannel, and when thoroughly dry polish with a fresh piece of flannel.

Popular Names for Towns.

There are 31 Franklins given in the latest United States postal guide, Chester and Clinton are close seconds, there being 30 towns and cities by each of these names in the United States. Washington and Newport come next in popularity, each having 28.

Neat Blarney.

"Why does your horse go so slow?" asked a tourist one day in the Glen of the Downs, Ireland, of his driver. "It is out of respect to the barntful sanery, yer honor—he wants ye to see it all. And thin he's an intelligent baste and appreciates good company, an' wants to kape the like o' ye in ould Ireland as long as he can."

Bird Friends of Gardener.

Few people realize the value of birds in keeping garden insects under control. Even the despised English sparrow sometimes eats a worm. I have watched them for hours, busily chasing moths which the birds go after with far more energy than they ever display in gathering seeds.—Exchange.

When Sneezing Was a Bad Omen.

Sneezing from remote times has been held ominous. Our forefathers went to bed again if they sneezed while putting on their shoes. A sneeze to the right was deemed lucky; to the left of evil portent. To sneeze near a burial place was unlucky.

Monkeys Hard to Train.

Performing monkeys seldom live more than a few months. Many of them die of fright while being trained, and it is consequently necessary for trainers to keep a large number of animal understudies.

Musical Taste.

Composer—"I've got a new song that's bound to make a hit." Concert Manager—"Any sense in it?" "None at all." "Any fun in it?" "Not a bit." "Any music in it?" "Not a note." "Quite right! You've got a success!"

Dickens as an Editor.

Charles Dickens was an editor for a third of a century. He began with Bentley's Miscellany in 1837 and was editing All the Year Round when he died in 1870.

"I ain't got no time," said Uncle Eben, "to listen to de man dat tells me I ain't appreciated, unless he kin step forward his ownself an' gimme a better job."

Strong Family Resemblance.

"Contentment," remarked Shinhone, "am a mighty thing; de only trouble 'bout it is it's kin' o' hard to 'stinguish from jes' plain laziness."—Boston Transcript.

Success Depends.

"Opportunities," said Uncle Eben, "is like race horses. Dar's allus plenty of 'em. De success of de track depends on pickin' de right one."

First U. S. Stamps.

Stamps were issued by postmasters as early as 1845, but the first official United States stamps were issued in 1847.

Daily Thought.

Wind puff's up empty bladders; opinion, fools.—Socrates.

Loyal Order of Moose

No. 80, of MONESSEN

Will Open its Gymnasium and School of Physical Culture and Athletic Development

Monday, October 20

To the public in general and members. The most modern and up-to-date equipment is now installed. Classes, male and female are now being enrolled, and will be continued through the winter. Private lessons in boxing or any other branch of physical development may be arranged.

REAL SHOE MEN

Charleroi,

Pa.

A bill in equity asking for the appointment of a receiver for the Cokeburg Workmen's Co-Operative association has been filed in the Washington county courts. The bill sets forth that the defendant firm is insolvent and that there is imminent danger that the property will be broken up, scattered and irreparable injury done to the creditors. A committee appointed by the defendant firm admits the charges and joins in the request for a receiver.

Eugene Arnold Yohe, son of Mr. and Mrs. LeRoy S. Yohe, died Saturday evening, October 18, at 7:45 o'clock, of influenza and pneumonia, aged 14 years and five months.

CLUB RECEPTION TO NEW MEMBERS

The annual reception to new members of the Monday Musical Club was held in the Sunday school room of the First Presbyterian church Monday evening. A short business meeting followed the address of the President Miss Nora Swan. The following program was then rendered: Piano, "En Bateau," Debussy, Miss Della Jacobs; solo, "Sweet, Miss Mary," Neidinger, Miss Isabelle Dorbritz; solo, "I hear a Thrush at Eve," Cadman, Miss Emma Clatter; reading, "Helping Uncle Joe," Mrs. A. W. Blackburn; solo, "Slumber Sea," Chisholm, Miss Edith Woodha; piano, "Bubbling Spring," Rive-King, Mrs. G. T. Barger; solo, "Farewell to Summer," Johnson, Mrs. A. G. Lewis. Accompanists were Miss Bethel Bowman and Mrs. C. W. Kinder. The room was beautifully decorated with autumn leaves and fall flowers. During the social hour refreshments were served by the executive committee, Misses Nora Swan, Della Swan, Elizabeth Frew, Ethel Borth and Mrs. Blackburn. The following new members were admitted to the club, Misses Mary Provins, Margaret Swan, Charlotte Swan, Margaret Gardner, Louise Hill, Margaret McDermott, Blanche Allison, Betty Rymer, Mrs. M. H. Hill, Price Frye, Fannie Bosson, Estelle Dunkerly and Frances Hort and Mrs. Charles Seals. Mrs. J. B. D. Hetrick, Mrs. G. D. Griffiths, Mrs. Fitch Wright.

CONDITIONS NORMAL AT DUQUESNE MILLS

Eighty per cent of the normal production is being maintained at the Homestead works of the Carnegie Steel Company, officials of the company stated last evening. Thirty-five thousand tons of ingots were produced during the last week. The highest tonnage for a single week during the year of 1918, when production was hastened because of the war, was 44,000 tons.

Ninety-four hundred men worked at the Homestead works last week. Slightly more than 2,500 are on strike. Fifty to 100 men returned to work daily last week.

The Duquesne works of the Carnegie Company are operating at nearly 100 per cent capacity, although there is a shortage of common labor. This shortage started before the strike and was caused by the foreign workers returning to their homes in Europe. Between 5,400 and 5,500 men are normally employed at this plant. Slightly less than 5,400 were at work last week.

NORMALS DEFEATED UNIONTOWN HIGH

The Uniontown High school football team, which plays the Charleroi High on Saturday next, was defeated by the California Normal, on the Normal grounds, last Saturday afternoon, by the score of 15 to 0. The Herald in its account of the game, said the Uniontown High team went out of its class to meet the Normal, and as a consequence sustained its second defeat of the season. Monday defeated Uniontown 19 to 0 some weeks ago, and thus, the Charleroi team is able to get some kind of a line on the visitors who are to be with us this week.

At the same time it is possible to see up the California Normal team, which will play in Charleroi on the 6th of November. The Normalites are said to be a husky team, made up of players more mature in years than the ordinary high school team, and as a consequence are able to put up a stronger game. However, the appearance of the team in Charleroi will be waited with interest, for the locals by that time will have had a great deal more seasoning, and will be able to give the visitors a real contest.

MASQUERADE SOCIAL AT CURTIN SCHOOL

The teacher and pupils of Curtin school, Fallowfield township, will hold a masquerade social Thursday evening, October 30th. A short programme has been arranged, which will be given at 8 o'clock, p. m. after which lunch will be served. All those attending are asked to come in costume.

Reason for Accidentals.

Too many accidentals spoil the melody. It's true they may keep you guessing, but they also keep you unsettled. And again it is the same with life. Men of judgment treat accidentals for what they are worth. But they aim to keep life to its regular course. Some lives are ruined by a love for the exceptional. They seem to be unable to follow the necessary routine of life. So the wise man aims to keep life sweet and normal, knowing that the best serves himself and his fellow-men by meeting daily needs with the best that's in him.

Lioness Fought a Motorcar.

The East African Standard describes a duel between a motorcar and a lioness. The affair, it says, happened at night near Nairobi. The chauffeur noted a commotion in the bush near the road, then the gleaming eyes of an enraged wild animal. He accelerated his speed at the instant the lioness leaped. She struck the hood and was thrown far in advance of the car, whose wheels then passed over her. The dead lioness was finally loaded into the car and taken back to the town in triumph—From Outlook.

Stone Don't Grow.

Natural agencies operate to form beds of rock such as limestone, etc., just the same as beds of rock now in existence were formed at earlier periods in the earth's history. But the rocks and boulders scattered about the surface of the earth do not grow, notwithstanding the popular belief to the contrary. Instead, they actually diminish in size, owing to the action of frost, wind and other disintegrating agencies.

Young Men Who Won Fame.

It has been said the story of success is the story of young men. Among the "famous before forty" are many of the world's best known names. At sixteen years of age Bacon pointed out the errors of Aristotle's philosophy; Edward Landseer gained fame by his picture, "Dogs Fighting"; and Dublin, writer of sea songs, staged his first comedy, "The Shepherd's Article," at Covent Garden.

Question Before the House.

"I wonder," said the disappointed bachelor, "what one is going to do when one buys woolen wear guaranteed not to shrink, and patronizes a laundry that guarantees not to shrink the unshrinkables, and then finds that the unshrinkable laundry shrinks the unshrinkable garments?" — London Sketch.

On the Pike.

The old national pike, that magnificent road that used to run from Maryland to Illinois, witnessed some sharp turns of fast driving and many an adventure of travel. The New York Tribune tells one story about Henry Clay, who was sometimes called the "Father of the Turnpike." He was traveling along the pike in a coach, when the horses ran and spilled him out headlong into the mucky road. "No harm done," he said when the driver rushed to pick him up. "Only a poor picture of Pennsylvania sand with Kentucky clay!"

Dictaphone Calls Mother.

A dictaphone with a megaphone and a loud-speaking amplifier in the receiver is shown in Popular Mechanics Magazine. With the receiver fastened to the baby's crib in the nursery upstairs, and the megaphone placed in the parlour below, the arrangement works to satisfaction. Mother may go about her housework, while baby will sleep soundly, undisturbed by the noise of the living room, but if he should waken his cries will be instantly heard downstairs.

United States of the World.

The day will come when we shall realize not only the brotherhood of individuals but the essential unity of all mankind. All are brothers; all children of the same father. The barriers which divide nations are artificial. I believe the time is at hand when these barriers will fall like the walls of Jericho, before love's trumpet summons, when the banner of brotherhood and freedom will float forever over a new federation—the United States of the World.—Tolstoy

FOR RENT—Two furnished rooms ment. \$15 per week. Give present for light housekeeping. Inquire 924 McKean avenue. 117-13-p

Why Hair Stands on End.

When hair stands on end on the back of a dog or cat when frightened it is moved by tiny muscles attached to the roots. The hair follicle is like a little seed buried in the flesh. Attached to either side of this seed are tiny muscles which run diagonally through the flesh from the lower part of the back to the hair follicle. These little muscles are like the guy ropes of a tent. They are what are called the erector muscles, and when fear or cold is experienced these muscles promptly tighten up in such a manner as to "hoist" the hair very quickly.

Arctic Night.

Viewed solely as a matter of optics, the Arctic night is as dark as any night. Explorers in high latitudes say, however, that there are many alleviations of the obscurity. The stars flash keenly, the moon comes along in a regular succession of phases, the snow surface reflects the gloom under conditions of the utmost absence of light and the aurora borealis is the finest kind of illuminant. Explorers all agree that their men pass the winter night without much difficulty if only there are means of amusement.

The Amazon.

The Amazon discharges the largest amount of water of any river in the world, and the St. Lawrence next. Other interesting facts about these rivers are that the length of the Amazon is 3,300 miles and its width varies from a few hundred feet at different points to more than 100 miles at its mouth. The St. Lawrence is 2,200 miles in length, is from one to several miles wide at places to ninety miles at its mouth.

Abbreviations.

The letters L. e. are an abbreviation of the Latin phrase "l. e." meaning "that is," and the letters e. g. an abbreviation of the Latin phrase "exemplum gratia" meaning "for the sake of example" and for instance. The Latin word versus, meaning "against." Vice versa is a phrase meaning "the order or relation of terms being reversed."

Dreaming of Cats.

To dream of cats is said not to be lucky. If you dream of a black cat your enemies are active; to be bitten by one indicates misfortune; burglars are about when a cat follows you in a dream; while to dream you are stroking one means beware of false friends.

Long Indian Name.

The longest geographical Indian name is probably that of Lake Charzagozmannahungahschelunnungungah. This lake is in Massachusetts and its name has recently been changed to Lake Webster. The word is of Algonquian origin and is said to mean "flow the south wind made a large water where many blackbirds chatter."

Expensive and Unnecessary.

The fact that all the buttons that have been given out to be testimony to the wearers' participation in the performance of public duty few are worn should be admission to put the time consumed in the making of such buttons and the money spent to pay for them, to better use.—Albany Journal.

Small Daily Task.

Nothing simple is so potent as a law that may not be disobeyed. It has the force of the water-drop that hollows the stone. A small daily task, if it be really daily, will bear the labors of a spasmodic Hercules.—Anthony Trollope.

"Catsup."

The word "catsup," which is spelled "catsup," "catchup," "ketchup" and "kitchup," is a corruption of the Chinese word "kitjap," the name given to an inferior kind of soy made in China.

A Little Girl's Problem.

The father of a little girl I know is a Methodist, and her mother an Episcopalian, and the poor child never knows, in saying her prayers, whether to end them with "Amen" or "Ah-men."—E. W. Howe's Monthly.

"Readin' 'bout what dem soldier men went through."

"Readin' 'bout what dem soldier men went through," said Uncle Eben, "is g'ineter make it mighty hard to sympathize with de man dat complains 'bout a little thing like a hot day."

Seek to Retain Old Friends.

The years have taught some sweet, some bitter lessons—none wiser than this: to spend in all things else, but of old friends to be most miserly.—Lafayette.

Nerves-of-Smell Note.

In spite of the vast mechanical improvements of the age, the best alarm clock is still the sweet perfume of frying ham and eggs.—Toledo Blade.

Drunk With Love.

"Oh, Amorous Dove" by this imposing queen, was one of the best sets of the evening.—New York Times.

Daily Thought.

Without thoughts never to—Lafayette.

Undeveloped Country.

Lake St. John, at the head of the picturesque Saguenay river, has been brought to the notice of the Royal Society of Arts by Prof. J. C. McLennan as one of the best undeveloped power sources in North America. It has an area of about 350 square miles, drains a basin of 30,000 square miles, and is 315 feet above sea level. Three or four developed power sites are capable of yielding a total of 1,000,000 horse power at lowwater, and many sites for docks and industrial plants are available on the river.

When Boston Was in Trouble.

In 1774, on the 1st of June, the Boston port bill went into operation. At noon the harbor was closed against all vessels and business was suspended. In a 20 days' notice the citizens of Boston were deprived of their means of gaining a living. Indignation ran high throughout the colonies' contributions were raised in other cities for their relief, and the people of Marblehead offered the Boston merchants the use of their wharves.

Surely Drafty.

There are all sorts of different ways of bringing a thing home to people. Take the case, for instance, of a member of the Essex district council in England, recently, who wanted to enable his fellow-councillors to realize the shameful disrepair of a certain cottage near by. It was so drafty, he said, that tunes could be played on a mouth organ moved up and down along cracks in the walls.

Didn't Quite Understand.

Little John and his mother were visiting at the minister's home one day, when John picked up a Testament from the table. The minister's wife said: "You must not play with that book, for it is God's book." A week later, while at the minister's home again, he spied the book and said: "Why doesn't God come and get his book?"

Woman's Brainiest Age.

A woman's brain reaches its greatest weight about the age of twenty-five while in the case of a man, this does not occur until ten years later. This explains the assertion that a woman at the age of twenty-one is in a better position to give a matured judgment than a man at the same age.

Education Always Helps.

The success of the unlettered man is often argued to show that men do not need education. In special cases the truth may seem to be conclusive, but did you ever stop to inquire what the fellow might have become had he education added to his natural talents? He has succeeded in spite of a handicap and not because of it.

Only That Difference.

As I was going shopping I met a charming little fellow, who spoke to me quite politely. In further conversation I inquired his name. "Oh," he answered with easy assurance, "it's just the same as my daddy's, only it's got 'Jr.' on the end of it."—Chicago Tribune.

Solomon's Fountain.

Water from King Solomon's "Sealed Fountain," seven miles from Jerusalem, is conveyed to the city through modern iron pipes part of the way, and the remainder of the distance by an ancient sluiceway known as Solomon's aqueduct.

Japanese Marriage Agencies.

Marriage agencies in Japan are now limited to 25 pesos fee on each match made. One peso for an introduction five for a hunt for a life partner and the rest for actually binding two together are the legal prices.

Is the Converse True?

The Chinese have a proverb directed against "bachelors," for whom they have a particular aversion. Is it applicable in America? "The great church bells rarely sound; the full cask returns no sound."

As Usual.

The man who is always telling what a perfectly lovely place he used to live in makes you wonder how he ever came to leave such an Eden.—Farm Life.

Almost Any Excuse Goes.

We break many a promise to ourselves with excuses so weak that we would be ashamed to offer them to another.

Mutual Obligations.

"Husbands should be frank and tell their wives everything," says a woman writer. Yes, and wives should be generous and believe it.

Daily Thought.

Gravity is the ballast of the soul, which keeps the mind steady.—Fuller.

Causes for Divorce.

Desertion ranks first as a cause for divorce, cruelty second, adultery third.

When William Niblo opened his new theater at Broadway and Prince street, back on Independence day, 1828, he celebrated the double occasion by a patriotic display of gas lights which flamed the name of "Niblo" far and wide and immortalized it in stage as well as gas history. An admiring public gasped from a respectful distance, watching the red, white and blue shadows cast by the rows of gas jets spelling the proprietor's name.

Gas had been used for the first time in New York city five years before, but to the owner of Niblo's garden goes the credit of first using gas for illuminating a theater.—Gas Logic.

The swiftest dog in the world, the borzoi, or Russian wolfhound, has made record runs that show 75 feet in a second, which would give it a speed of 4,800 feet in a minute if the pace could be kept up.

Paper From Many Kinds of Bark. Fifty kinds of bark are now used to manufacture paper, besides banana skins, bean stalks, pea vines, coconut fiber, clover and hay, straw, fresh water weeds, sea weeds and over 150 kinds of grasses.

Electrical Currents.

The electrical worker is often called upon to determine whether the current at an outlet is alternating or direct and whether the voltage is 110 or 220. To indicate quickly and easily what kind of current is present a "determinator" has been developed. To operate the instrument its two pins, which are of the knife-blade type and constructed to render short circuits or shocks impossible, are placed in contact with the wires or terminals and a button at the bottom of the determinator is pressed. Then, should the current be direct, the letters "D. C." appear within one of the circles at the top of the device, while if the alternating current is present "A. C." shows up in the other circle. The brilliancy of the lights back of the letters indicates whether the voltage is 110 or 220.

Nature's Method.

Nature imitates herself. A grain thrown into good ground brings forth fruit; a principle thrown into a good mind brings forth fruit. Everything is created and conducted by the same master; the root, the branch, the fruit—the principles, the consequences.—Pascal.

New School's Snap Judgment.

A number of years ago when a Boston paper asked leading authors of his country and England to name the best poem in the English language James Whitcomb Riley chose Longfellow's "The Bridge." He found in it every element necessary to a perfect poem. Most of the other writers said there could not be any "best" and declined to make a selection. The new school of rhymeless and rhythmless verse writers have replied by following Ted Tappan out as "artificial" and second rate.—Exchange.

Recent investigations which have been made on the Pacific coast of Mexico reveal the existence of rich deposits of petroleum. These discoveries are of great importance, because they will ultimately serve to intensify maritime traffic and seem to presage for some of the western ports of Mexico a future as promising as that of Tampico or Tuxpam.

Simple Budget System.

"Every young wife should have a budget system to govern her expenditures."

"I know. I have one. I pay what I can and owe the rest."

Moose are found in large numbers on the flats around the headwaters of the Kootenai and Columbia rivers. They are usually large and beautiful. There are mountain lion, wolves, elk, deer, lynx and all sorts of small game in the Canadian Rockies, says an exchange, but more hunters come for mountain sheep and goats than for other hunting. The big horn sheep, appreciating the protection afforded by the park, are sometimes a little difficult, but they are increasing rapidly, while in all other parts of the continent they are dying out. The goats, too, seen on clear days like specks of moving snow on the mountain sides, from the verandas and terraces of the Banff Springs hotel, are increasing.

Nuts.

A nut lock has been invented that consists of a plate of metal to be placed between two nuts with wings at the sides that can be bent to grip the nuts.

Great Is Enthusiasm.

Enthusiasm comes with the revelation of true and satisfying objects of devotion, and it is enthusiasm that sets the powers free.—Woodrow Wilson.
